

# The Quiet Themes of Geomancy

The map is not the territory. Unless you're doing geomancy; although in that case, the territory becomes the map.

Your kid's geography textbook is actually a grimoire. Don't bother with the political or resource maps: everybody tries to manipulate the geomantic energies associated with *those*. Climate maps are almost as vulnerable to being jammed, these days. But you can still do a lot with topographic maps. With the right ruler, you can track and observe arcane energy flows: if nothing else, it's a good way to replenish magical energy.

Note, though: topographic maps. *Topological* maps are *strictly* for divination only.
