

Count Your Blessings

You know why things feel like they aren't going the way they should? It's because they aren't. History got diverted, fourteen decades ago.

It wasn't easy to divert it, either. It's even harder to keep it diverted. The way history is *supposed* to go is still there, dug deep into the foundations of reality itself. Human perceptions of thwarted destiny manifest as a nagging sense that something's *off*, which by definition it is; some people feel it more than others, but almost everyone gets a taste, and at least a mild urge to change things back.

Which would be... *bad*.
