

Ergognomics

The other wizards looked at 'Earth,' and marveled how people there had such wondrous devices. Me, I marveled at how they put those devices together, and... *smoothed* everything down to make their devices work better. They even had a word for it: 'ergonomics.' I kept calling it 'ergognomics,' though. Because it was like gnomes, right?

I think that's the reason why I remembered the word, even after we had our memories blurred upon our return home. Unlike 'guns' or 'electricity,' it's something we *can* do! We just needed the concept.

...There's a lot of things that need *smoothing* around here.
