

# The UnCompiled

Don't go to the old websites.

Oh, the programmers will tell you everything's safe, assuming they'll even admit things were once *unsafe*. They'll assure you they neutralized the threat of the UnCompiled Code years ago. Flash was the key. Flash was the key, and the gate. When they rammed a stake through its heart, all the disquieting, feral software that used it died as well.

They know nothing. They slapped math on chaos and called it tamed, and now nobody goes down into the digital basement to see what breeds there. Or goes *twice*.

Don't go to the old websites.
