

# Brain Smoothies

Telepathy is a disease for which there is no cure. It turns out that when two human minds encounter each other psychically, they *homogenize*. What you get is a gestalt personality in both brains that *can't* be unscrambled, later. It's also involuntary.

The good news? Well, first off, telepathy is not a *contagious* disease. Telepaths can't read non-telepath minds. You need to have a special kind of brain to receive thought transmissions. So, no Mindemic, or anything similar.

More importantly, the gestalt personalities all seem nice. Merging people's heads apparently mitigates the bad stuff already in them. Which is nice.
